

# Your GRC solutions enhanced with responsible AI you control

**BCG ranks Risk and Compliance as the top support function for AI and GenAI adoption, followed by IT/Tech.** With GRC teams accelerating their use of AI to reduce manual admin overhead, CoreStream GRC helps you **move fast, while staying safe.**

As our CPO puts it, *“Clients want to adopt best-of-breed AI, but in a way that mitigates the potential risk and ultimately protects their organization.”*

We’re here to make that possible.

CoreStream GRC connects your solutions, whether it’s policy management, third-party risk, compliance, or build your own, to **your business-owned LLMs** and our **best-of-breed AI technology partners**, with the governance and choice enterprise teams need.

The GRC platform that truly works for you.

## Trusted by companies around the world

## GRC-powered AI you can choose to enable

**Fast to roll out:** quick deployments, no heavy code, and integrations across your existing toolchain.

- **Never ‘AI for the sake of AI’:** we believe in implementing top-tier solutions for our clients that flex to their needs. Therefore, our AI integrations are only used when they can add value and are in line with your company’s practical objectives.
- **Security and control come first:** we have implemented client-specific **Azure OpenAI**, as well as client-owned LLMs to alleviate data privacy concerns
- **Expert-led guidance:** our ex-big 4 consultants with you to design, challenge and create AI workflows that benefit not confuse end-users.
- **Non-AI environment available:** you can run CoreStream GRC without AI integrations.

*“AI is powerful for automation, but its impact depends entirely on how it’s applied within each organization.*

*Human judgment still leads the way, AI gives people the time to use it well.*

*When teams are no longer spending 60% of their time on admin and tech, they can focus on higher-value decisions.*

*That’s why we offer expert-led workshops to help design and apply AI in a way that truly makes sense for your business.*

“Traditional methods of risk and compliance management, though important, are often too slow to respond to the fast-moving and increasingly complex threats lurking around every corner.

Here’s where AI comes in, like a vigilant security guard on high alert, 24/7. AI doesn’t just sit back and wait for something bad to happen. It continuously scans systems for signs of unusual activity, learning from historical data to predict future threats before they even materialize.”

Michael Rasmussen

GRC Analyst & Pundit at GRC 20/20 Research

## Meet some of our expert AI partners

*“These partnerships allows us to focus on our core competencies and do what we do best. We trust that those we partner with in AI will do the same.”*

Rich Eddolls, Chief Product Officer at CoreStream GRC

Strengthen third-party cyber risk management. Automate assessments, map findings to frameworks, quantify risk (including Open FAIR), and reduce manual effort.

Connect internal GRC data with external risk and reputation intelligence. Feed alerts into CoreStream GRC so teams can score, route, and act through existing workflows.

Modernize due diligence without losing human judgment. Automated gathering and reporting, with results flowing into CoreStream GRC for triage, collaboration, and audit-ready records.

Regulatory Lifecycle Management for financial services. Real-time horizon scanning and automated regulatory change management linked to obligations, policies, and controls.

## Opt-in to our AI Co-Pilot (your personal GRC assistant)

Use natural language to speed up everyday work across risk management tools, audit management software, and compliance management software.

### What it does:

- Turns a simple risk description into **enriched, high-quality suggestions**, even if the input is incomplete.
- **Auto-populates forms in seconds** once you select a suggestion.
- Improves consistency and **reduces manual documentation errors**.
- Reviews controls and linked risks for suitability and **documentation quality**.
- Answers questions by **quoting sources from your policies** and procedures.
- 

This is how **GRC software** becomes usable every day, not just during audit season.
