

Modern GRC for financial services, built for agility and assurance

CoreStream GRC is no-code governance, risk and compliance management software platform for banks, insurers, and investment firms. Run risk, controls, regulatory change, audit, and third-party workflows as one connected system with clear ownership and defensible audit trails.

Built for frameworks like the **UK Corporate Governance Code**, **SOX-style controls**, **DORA**, and **multi-regulator supervision**.

Trusted by companies around the world

Audit-ready GRC for regulated finance teams

Whether you're working under **SMCR** accountability, **SOX**-style controls, or **UK Corporate Governance Code** expectations, you're judged on proof. Disconnected tools force you to rebuild the story every time scrutiny hits.

Connected traceability, end to end

CoreStream GRC gives you **end-to-end traceability** across the full chain:

Requirement → policy → control → test → issue → remediation

CoreStream GRC **locks in owners, approvals, timestamps, and evidence as work happens**, not during audit week.

Talk to our in-house finance expert

Paul Cadwallader is CoreStream GRC's Financial Services GRC expert and Strategy Director. Before joining us, Paul was a Deloitte Partner, advising financial services clients on controls, assurance, and operating models across complex, multi-entity environments.

He has spent 25+ years helping banks, insurers, and investment firms turn governance, risk, and compliance into something that holds up under real scrutiny from regulators, boards, and auditors.

"I've now got the time for more assessments, more assurance reviews, more deep dives, more engagement with the business. Improving quality. We're very happy with CoreStream GRC, **very happy.**"

Helio Correa
Head of Risk

“Delivering on some of the most complex third party risk, internal control, and risk management projects for major corporations.

CoreStream GRC’s platform is a powerhouse: agile, highly configurable, and capable of being tailored to an organization’s specific needs with minimal effort.”

Michael Rasmussen GRC Analyst & Pundit
at GRC 20/20 Research

Pool Reinsurance: replacing the spreadsheet safety net

They had a risk tool, but adoption was minimal. The spreadsheet safety net took over.

Quarterly reporting became “a 3-week ordeal.”

What changed with CoreStream GRC:

- **Single source of truth** expanded across risk, conflicts of interest, gifts and hospitality
- **User adoption jumped** from **40% to 95% response rate**
- **Fast implementation** with a soft launch **7 days early**
- **Reporting time saved: one week per quarter** in data manipulation

[Pool Re case study](#)

Company snapshot:

- UK’s largest terrorism reinsurer
- Serves 150+ insurers
- Covers £2.2 trillion of UK-based assets

Why finance organizations choose CoreStream GRC

- **Powerful risk visualizations** (risk bow-tie, risk flight path, risk matrices) built into the workflow
- **Configurable** prompts, terminology, and guidance so teams do not “interpret” risk differently by accident
- Connect **your own AI model** securely to reduce manual work while keeping a human in the loop, and your IT team happy
- **Integrations** that finance teams already use (for example, AscentAI for horizon scanning, plus tools like Xapien, Black Kite, LexisNexis, Power BI, SAP)
- **Secure platform** aligned to required IT standards, including ISO 27001, NIS2 (and region-specific requirements where needed)
- CoreStream GRC **partners with leading advisory firms**, like [PwC Middle East](#) to help financial institutions operationalize third-party risk management at scale.

Seamless integrations for your risk & compliance processes
