

Transform healthcare compliance: smarter GRC for safer patient outcomes

Healthcare is safety-critical and data-heavy. When something goes wrong, leadership and regulators don't ask what you intended. They ask what you can prove.

You are balancing **patient safety, privacy, cyber risk, operational resilience, third-party exposure, and fast-moving clinical and research operations.**

CoreStream GRC is **built for healthcare's dynamic working environments** where what you can prove matters.

Trusted by companies around the world

Healthcare teams use CoreStream GRC to:

- Run conflict of interest, privacy, incidents, third-party risk, audits, and policies in **one connected system**
- Assign **clear ownership with automated follow-up**, so tasks do not disappear
- Capture approvals, exceptions, decisions, and closure in a **single audit trail**
- Produce **regulator-ready reporting** without manual chasing
- **Support busy non-GRC specialists** with an intuitive experience that drives adoption

Book a 60-minute healthcare GRC workshop

Work directly with CoreStream GRC experts to **pressure-test where governance breaks under healthcare workload**, what you need to evidence, and how to reduce manual chasing and reporting.

"If I go off to another compliance office, I will be suggesting CoreStream GRC. I think it's a great system. It's an easy process, for employees and for us. We can log in and very easily do what we need to do. **I really do enjoy CoreStream.**"

Proven in healthcare: outcomes from healthcare implementations

NHS
Health Education England

NHS Health Education England: information asset management at scale

- Problem:** Managing information assets across teams and locations, with scale and consistency challenges.
- CoreStream GRC solution:** A structured, trackable system with clear roles and reporting.
- Results:**
- 700+ assets** managed across teams and locations
- 350+ admin users** actively using the platform
- Live in **8 weeks**, including a **3-week proof of concept**

UNT Health (Texas): proactive conflict of interest management with intuitive Open Payments integration

- Problem:** Legacy tool & spreadsheets. Low visibility. Too much chasing.
- CoreStream GRC solution:** Conflict of interest management built for day-to-day use, with clear ownership and workflow.
- Results:**
- 50+ conflicts** identified in the first campaign
- Less manual follow-up through automation
- Open Payments integration** improved oversight and clarity
- Implemented in roughly **60 days**

NHS
Nottingham
University Hospitals
NHS Foundation Trust

Nottingham University Hospitals NHS Trust: SARs and FOI under control

- Reported time savings: **3 - 5 hours per user per week**
- Central hub for SAR and FOI workflows with a full audit trail
- New users up to speed in **under 15 minutes** due to intuitive design

"I'd rather see the whole picture, even if that can often feel daunting and CoreStream GRC has allowed us to have this. It's great and we can now openly work to plan ahead and identify areas to continue to improve the service we provide."
